

Method and Apparatus for Generating Structured Documents for Various Presentations and the Uses thereof

Abstract

5 The use of a method/apparatus for generating structured
documents is disclosed. A counter is coupled for a product
implementing the method/apparatus. When the counter is permitted
to increment, the structured documents can be generated from
unstructured documents. Identifiers in user-defined document type
10 definitions are used to associate selected objects or group objects
in the unstructured documents so that association information of
the selected objects or group objects can facilitate the generation of
files in a markup language suitable for presentations on various
media.
